LinkedIn: William Burrión

Professional profile

Full-stack developer with five years of experience in web and mobile applications, bot automation, API integration and cloud operations. Experience working with clients in North and Latin America. My toolkit includes JavaScript/TypeScript, Node.js, React Native, Angular, PHP/Laravel, the .NET ecosystem, AWS and GCP.

Professional experience

Senior developer | Corporación Alisa

February 2026 - present

Development of iOS and Android applications with React Native, desktop applications and administrative systems. Services built with Node.js and Express, with data managed in SQL Server and PostgreSQL.

AWS deployments, CI/CD automation and modernization of PHP systems. Technical mentoring, code reviews and adoption of Clean Architecture and SOLID principles.

Bot development specialist | iSoft-ste

June 2022 - June 2026

Development of Facebook and WhatsApp bots, web and mobile applications with Angular and Node.js, and API integrations with client systems.

Development of a bot-building platform, GCP operations using Docker, Firebase and Cloud Functions, and preparation of reports and technical documentation.

Full-stack developer | Plani-go

May 2021 - May 2022

Web systems with PHP, Laravel and MySQL, and mobile applications with React Native. Resident and administrator portals, Android application maintenance and QR-based cleaning management.

Core technologies

Interfaces: React, React Native, Angular, TypeScript, Expo, HTML and CSS.
Services and data: Node.js, Express, Laravel, C#/.NET, SQL Server, MySQL, PostgreSQL, MongoDB and Redis.
Cloud and architecture: AWS, GCP, Firebase, Docker, CI/CD, microservices, SOLID and DDD.

Projects and education

Selected projects

Building and residential management

Architecture and development of a PHP/Laravel property-management platform. Billing, access control and maintenance modules, together with resident and administrator portals.

Bot engine and web services

Multichannel automation and web-service integrations connecting social-media support with corporate systems. Work on service scalability and operations.

ERP ecosystem and corporate applications

Full-stack web and mobile development with React Native, TypeScript, Node.js and PostgreSQL on AWS. AI integration into internal processes and an ordering/pickup platform.

Education

Akamonkai Japanese Language School | Tokyo, Japan

April - September 2025

Intensive Japanese course. Japanese proficiency at N4 level.

Universidad Mariano Gálvez | Guatemala

2021 - 2022

Completed two years of Computer Science Engineering studies.

Liceo Compu-Market | Guatemala

Secondary school diploma in Computing, 2020. Selected as flag bearer for academic achievement.

Courses and languages

Unity Game Development, Udemy (2023).
Deep Learning & Artificial Intelligence, Udemy (2023).

Languages: Spanish; English A2; Japanese N4.

Technical interests

Game development with Unity and C#, automation, software architecture and cross-platform applications.
